

Gabriele Viganò

COMPUTER ENGINEERING STUDENT

Milan, Italy

✉ info@viganogabriele.com | 📧 viganogabriele | 🌐 viganogabriele

Summary

Computer Engineering student at Politecnico di Milano, directing a 60+ person organization and 100+ community admins at PoliNetwork: building the tools, running the events, and owning the infrastructure that connects 45,000+ students at one of Europe's top engineering universities.

Education

Politecnico di Milano

B.SC. IN COMPUTER ENGINEERING

- QS World University Rankings #20 in Engineering & Technology

Milan, Italy

09/2024 – Present

Work Experience

PoliNetwork

BOARD MEMBER & TREASURER | PRODUCT & OPERATIONS LEAD

Milan, Italy

09/2024 – Present

- **Product ownership:** Led a full redesign of the web platform for 45,000+ students, rebuilding from scratch and connecting existing services (bot, URL shortener, internal dashboard) into a coherent product. Defined UX, information architecture and user flows. Reviewed and edited all design outputs directly in Figma.
- **QA & integration:** Owned end-to-end testing across all IT services. Caught bugs and UX gaps, wrote technical specifications for fixes, and tracked resolution across web, bot and internal tools.
- **Team building:** Recruited 30+ volunteers across 5 teams, designed a structured multi-stage interview process in Italian and English, and built lean high-output teams with appointed leads including international members.
- **Leadership & operations:** Managed full project lifecycle across IT and design, coaching leads to delegate and keeping development aligned with product goals. Oversaw annual treasury and fiscal compliance.
- **Events & partnerships:** Organized multiple community events up to 1,000+ attendees with structured feedback collection at each edition. Developed corporate and association partnerships via direct company outreach.

Projects

viganogabriele.com

FRONT-END DEVELOPER

- Built and shipped a personal site with React, TypeScript, Vite and Framer Motion. Designed interaction patterns, custom animations and full visual identity from scratch.

StudyQuest

TEAM LEAD & FULL-STACK DEVELOPER

- Coordinated a 4-person team to design and ship an AI-powered study planner with spaced repetition and gamification in a 24-hour hackathon. Stack: React Native, Expo, Gemini API, Zustand.

Homelab Infrastructure

SELF-HOSTING / SYSADMIN

- Designed and deployed a home server on Proxmox and TrueNAS, running services via LXC containers and VMs with layered local redundancy and encrypted cloud backup.

Skills

Leadership Project Management, Event Management, Public Speaking

Development JavaScript, HTML, CSS, C

DevOps & Tools Git, Linux, Proxmox, TrueNAS

Design Figma, Canva, Photoshop

Productivity Microsoft Office (Excel, Word, PowerPoint), Notion

Languages Italian (Native), English (Professional Working)

Certifications

2025 **Leadership**, Learnn

2025 **Public Speaking**, Learnn
