

Gabriele Viganò

COMPUTER ENGINEERING STUDENT

Milan, Italy | EU citizen, open to relocation

✉ info@viganogabriele.com | 🏠 www.viganogabriele.com | 📱 viganogabriele | 🌐 viganogabriele

Summary

Computer Engineering student at Politecnico di Milano. I own product and operations at PoliNetwork, the independent non-profit (APS/ETS) behind 500+ Telegram and WhatsApp groups for Politecnico students, 18,000 members in the main one. Elected to its 7-person board by the members' assembly in my first year. Self-taught on infrastructure, now learning to write the code I have specified, tested and shipped with others.

Education

Politecnico di Milano

Milan, Italy

B.SC. IN COMPUTER ENGINEERING

09/2024 – 2028 (expected)

- Coursework: Computer Science Fundamentals (C), Computer Architecture and Operating Systems, Communications and Internet.

Experience

PoliNetwork

Milan, Italy

BOARD MEMBER & TREASURER, PRODUCT & OPERATIONS

08/2024 – Present

- **Scope:** Volunteer role. Community admin from 08/2024, elected to the board in 11/2024. The association was struggling; the board rebuilt its teams and processes. Product, QA and treasury are mine.
- **Product:** Product manager for polinetwork.org (6.7K clicks and 52.6K impressions a month, Search Console, 4-month average 2026). Scoped the rebuild to feature parity plus services that had gone dead, and deferred new features. Defined UX, information architecture and user flows; reviewed and edited all design outputs in Figma. In build, launch planned 09/2026.
- **QA & integration:** Own end-to-end testing across the association's IT services (site, Telegram bot, URL shortener, internal dashboard). File issues in the open-source repos, write technical specifications for fixes, and track resolution.
- **Team building:** Recruited 30+ volunteers across 5 teams through a multi-stage interview process I designed and ran in Italian and English. Appointed and coached team leads, including international members. Chair the members' assembly of 40 people.
- **Treasury:** Prepare the annual budget for board and assembly approval; handle dues from 40 members and fiscal compliance.
- **Events:** Started the programme on my second day at university: a freshman meetup that drew 150–200, then a 1,000 person edition the year after, both organised single-handed. Built a team after that and delivered two 400 person events with structured feedback.
- **Partnerships:** Closed a standing partnership with University Network, a national student media network: PoliNetwork got a stand at their festival, and I brought 4 other associations in.

Freelance

Modena, Italy

PRIVATE TUTOR

07/2022 – 09/2024

- Paid to teach C and computer fundamentals to 3 secondary school students, around 30 hours, while still in secondary school myself.

Projects

Homelab & Remote Dev Infrastructure

Bot source on GitHub

SELF-HOSTING / SYSADMIN

12/2025 – Present

- TrueNAS node, 4x4TB RAIDZ1 with scrubs and encrypted cloud backup, for 6 users. Proxmox mini-PC with LXC containers: WireGuard for remote access, off by default and started on demand by a Telegram bot locked to my account, plus CUPS and Home Assistant.
- Oracle cloud VPS reachable over Tailscale from desktop, browser and phone, running Claude Code and Codex in a prepared environment. They open pull requests and deploys, I review the previews on Vercel, so work continues off my own machine.

FRONT-END DEVELOPER

04/2026 – Present

- Designed and shipped my personal site: interaction patterns, custom animations and the full visual identity from scratch. Built with React, TypeScript, Vite and Framer Motion, with AI assistance on the code.

StudyQuest

GDG AI Hack 2026, Milan

TEAM LEAD

05/2026

- Led a 4-person team at Google's GDG AI Hack (160 participants): set the timeline, chose the feature set and assigned work. Shipped a gamified study planner in 24 hours, spaced repetition for scheduling, Gemini API for plans. React Native and Expo, AI-assisted. Demo video in the repo.

Skills

Programming

C, JavaScript (in progress)

Markup & Styling

HTML, CSS

Infrastructure

Linux, Proxmox, LXC, TrueNAS, ZFS, WireGuard, Tailscale, Git

AI-Assisted Development

Claude Code, Codex, Gemini, prompt design, self-hosted agent environments

Product & Leadership

Figma, UX & information architecture, QA specs, recruitment, team management, public speaking

Languages

Italian (Native), English (Professional Working)
